Re: Ex Parte Communication. ET Docket No. 06-135

Dear Ms. Dortch:

Pursuant to Section 1.1206(b)(2) of the Commission's Rules, this is to notify you that on February 20 and 21, 2008, representatives of Texas Instruments (TI) participated in separate meetings with the following Commission staff: Bruce Liang Gottlieb, Office of Commissioner Copps; Renee Crittendon, Office of Commissioner Adelstein; Angela Giancarlo, Office of Commissioner McDowell; Wayne Leighton, Office of Commissioner Tate; Krista Witanowski, Office of Chairman Martin; and Julius Knapp, Alan Stilwell, Bruce Romano, Jamison Prime, Ronald Repasi and Gary Thayer of the Office of Engineering and Technology. TI was represented by Doug Rasor, Vice President, Emerging Medical Devices; Robert Koppel, Director of Government Relations; and Bill Krenik, Chief Technology Officer, Wireless Business unit.

TI expressed support for GE Healthcare's proposal to allocate the 2360 - 2400 MHz band, on a secondary basis, for innovative medical applications, including body sensor networks. TI discussed the broad range of semiconductors that it designs and produces for the adjoining 2400 MHz band, and noted the economies of scale and expedited time to market that could be achieved by allocating the 2360 - 2400 MHz band for medical applications. TI urged the Commission to issue expeditiously a Public Notice seeking comment on GEHC's proposal and/or a Notice of Proposed Rulemaking incorporating that proposal.

Pursuant to the Commission's Rules, one copy of this notice is being filed electronically with the Commission.

Sincerely,

Robert S. Koppel
Director, Government Relations
Telecommunications Policy
